Tomato abbreviations:

(DET) A determinate tomato is a 'bush' type. They need staking or a cage, but are much shorter than an indeterminate Tomato. Determinate Tomatoes should not be pruned or 'suckered' as every stem produces fruit.

(IND) An indeterminate tomato is a 'vine' type. They need tall stakes or trellising (6-8'). Indeterminate Tomatoes are usually pruned to have one or two stems, and need to be 'suckered' throughout the growing season. They grow continuously and produce fruit along the main stem(s).
